INTRODUCING...

...THE JACK B. NIMBLE™!

The new **Jack B. Nimble™** is the perfect accomplice to PDT's revolutionary Montana Jack® sickle scaler. Featuring a thin, contra-angled curved blade, the **Jack B. Nimble™** allows clinicians to easily apply extra lateral pressure while maintaining maximum surface contact. The design also improves access to narrow or crowded surfaces, as well as rotated or lingual surfaces in the anterior and premolar regions. Great for general scaling, it's also ideal for pediatric and orthodontic patients, and can even be used for cement removal. Incredibly useful, the **Jack B. Nimble™** belongs in every armamentarium!
