Help PDT Protect The Environment And Give Back On A Global Level

Our craftspeople selectively choose, then recondition any salvagable instruments sent to the PDT Earthcare™ program to donate to non-profit organizations and missions worldwide! What can't be donated, PDT recycles to reduce waste and help protect the environment.

Please fill out this form to send with your instruments

ALL returned instruments must be heat sterilized and clean of debris prior to shipping. Please bundle safely in groups of 12. The packaging should keep the instruments from poking through. If the instruments are not secured properly, they may protrude out of the package and cause harm to the postal workers. Please keep in mind the postal workers may file a legal complaint against the sender of any package that may cause them harm.
