Leaders in Innovation

competitor's
steel

- BRITTLE
- ACCENTUATED GRAIN LINES
- INCONSISTENT GRAIN STRUCTURE

PDT's
steel

- ✓ TOUGHER
- ✓ STRONGER
- ✓ HOLDS EDGE LONGER

- Proprietary heat treatment and cryogenic process produces tougher steel and less breakage
- Instrument tips are balanced with the axis of the handle for less torque and greater power
- Blades feature atraumatic, anatomical designs for increased patient comfort, faster healing and ease of adaptation
- Our attention to blade size, angulation, curvature and balance allows for superior adaptation, comfort and efficiency
